

Tele-Dapt 2000™ RF Connector Adapter Kit

The Telewave Tele-Dapt 2000™ is a generic RF adapter kit used to create temporary connections when the connectors on equipment and cables do not match. Typically used for connecting test equipment such as wattmeters to transmitters. The adapters and connectors are silver plated to minimize intermodulation, VSWR and insertion loss.

The kit contains 6 center adapters and two each of the following ends that are attached to the center adapters to create a solution:

- UHF Male (PL-259 - Plug)
- UHF Female (SO-239 - Jack)
- N Male
- N Female
- BNC Male
- BNC Female

Tele-Dapt 2000™ Parts List

CO2000	Complete Kit with Case
