

ANT390Y5-WR

YAGI ANTENNA 5 dBd

The Telewave.io ANT390Y5-WR is a high performance directional antenna, designed especially for point to point as well as point/ multipoint applications. This antenna produces 5 dBd forward gain with an excellent front-to-back

ratio. Solid aluminum elements with 360° welds prevent intermodulation and provide exceptional strength.

Each antenna is completely protected with our high-tech Txylan™ coating, which provides icing resistance and protection from corrosive gases, UV radiation, salt spray, acid rain and wind-blown sand. The feed line is protected within the boom, and the radiating element is completely sealed

against ice and other hazards with a tough, RF-transparent radome.

The ANT390Y5-WR includes a welded vertical plate and mast clamp set. A horizontal welded plate is optional, or the ANTM400H

adapter can be used. The clamp set fits any vertical mast or tower support from 1.5"-3.5" O.D.

For installations on angled supports, the Universal mount option deletes the welded clamp, providing 3 separate planes of rotation and almost any required orientation. The "U" mount attaches to virtually all supports up to 3.5" in diameter, and can be adapted to flat surfaces and utility poles.
